Cyber Week
June 27th-30th, 2022
Tel Aviv University, Israel
ABOUT THE ORGANIZERS

The Blavatnik Interdisciplinary Cyber Research Center (ICRC), inaugurated in 2014 at Tel Aviv University (TAU), is a joint initiative with the National Cyber Directorate of the Prime Minister's Office and provides an academic framework for interdisciplinary research on the dynamic and constantly evolving field of cyber. The Center’s 50+ TAU faculty members and 200+ cyber researchers have attained national and international prominence for their scholarship and industry expertise. They are drawn from many different disciplines including the Exact Sciences, Computer Science, Law, Engineering, Social Science, Management and the Humanities. Since its inception, the ICRC has aimed to enrich the volume and quality of academic research in the cyber field, provide leadership on emerging topics, and release reports and white papers on emerging topics. The ICRC researches key issues such as security software, attacks on hardware and software, cryptography, as well as the impact of these topics on national security, society, regulation and the business sector. As a leading international body in its field, the ICRC organizes international conferences, seminars, and workshops culminating in the annual Cyber Week conference which brings together 8,000 attendees from over 60 countries including official delegations.

The Yuval Ne’eman Workshop for Science, Technology and Security was launched in 2002 by Prof. Maj. Gen. (Ret.) Isaac Ben-Israel in conjunction with the Harold Hartog School of Policy and Government and the Security Studies Program at Tel Aviv University. The Workshop was founded with the clear directive of exploring the links between science, technology, and security. The Workshop conducts a broad range of research activities that include the publication of monographs, policy papers, and reports. Alongside its research activities, the Workshop supports an annual senior executive forum that promotes public-private partnerships and initiatives and a popular series of monthly conferences at Tel Aviv University with the participation of senior IDF staff and security organization members, politicians, academics, and executives from leading Israeli and international companies. The goal of the Workshop’s activities is to create an open and fruitful dialogue with the general public in the fields of interest of the Workshop: Cyber Security, Space and Emerging Issues of National Security.

The Foreign Ministry formulates, implements and presents the foreign policy of the Government of Israel. It represents the state vis-a-vis foreign governments and international organizations, endeavours to promote Israel’s economic, cultural, and scientific relations, and fosters cooperation with the business sector. Tel Aviv University (TAU)–Israel’s largest and most comprehensive institution of higher learning–is home to over 30,000 students studying in nine faculties and over 100 schools and departments across the spectrum of science, humanities and the arts. Situated in Israel’s cultural, financial and technological capital, TAU shares Tel-Aviv’s unshakable spirit of openness and innovation and boasts a campus life as dynamic and pluralistic as the metropolis itself. Tel Aviv is the city and Tel Aviv the university are one and the same—a thriving Mediterranean center of excellence. The university has a scope of scientific disciplines among the top in the world in terms of research and educational excellence, and educates Israel’s first choice for students, and its graduates are the most sought-after by Israeli companies. Global in outlook and impact, TAU advances teaching and research that break down the walls between disciplines, straddling to address the twenty-first century’s most pressing challenges through bold, interdisciplinary solutions.

The Israel National Cyber Directorate (INCD) is a national-level agency responsible for advancing and implementing cyber policy, reporting directly to the Prime Minister. The INCD’s tasks include protecting civilian cyber space, developing national cyber defense capabilities and improving Israel’s ability to meet strategic challenges in the field of cybersecurity. The INCD is also responsible for strengthening Israel’s international presence in cyber, specifically its status as a world leader in the development of cyber-related knowledge and technologies.

The Annual Youth Cyber Conference is a joint initiative of the Blavatnik ICRC at Tel Aviv University and the Cyber Education Center. The Cyber Education Center (CEC) was founded by the Rashi Foundation and the Ministry of Defense in 2010 to promote equal opportunities for youth from the geographical and social periphery of Israel. CEC develops and operates a variety of technological excellence programs that provide teenagers with the relevant skills and knowledge in order for them to choose a cyber-oriented military service and continue to tech academic studies followed by a significant career in Israel’s hi-tech industry.

The event is expected to bring together about 600 talented youth, tomorrow’s cyber leaders and students of cyber and science studies for the sixth year, to be enriched and inspired by innovative and fascinating sessions held by leading cyber experts in Israel.

MULTILATERAL FINANCIAL–CYBER ROUNDTABLE

Government officials from finance, treasury and cyber ministries will discuss possible collaboration channels and mutual challenges in maintaining the resilience and stability of the financial eco-system.
BSideTLV is a community-driven security conference in Tel-Aviv. It started by a group of hackers, security researchers and people passionate about cyber security who are keen to share their knowledge and ideas. Bsides creates opportunities for individuals to both present and participate in an intimate atmosphere that encourages collaboration. It is an intense event with discussions, demos, and interaction from participants. It is where conversations for the next-big-thing are happening.
Thank you for joining us. Looking forward to seeing you at Cyber Week 2023!
